Minority report, New School Building.

MINORITY REPORT ON NEW SCHOOL BUILDING.

Let us acquire the land between the present lot on Redington Street and the Church, or so much as is needed to provide for the next decade and build thereon a good, substantial modern house of six rooms and so planned as to be added to at such time as may be needed and indefinitely without marring the symmetry or economy of the whole.

And that the School Committee with such others joined as the meeting may see fit, be a committee to make terms for the adjoining land and to prepare plans and estimates in accordance with the above recommendations, and have them on file with the Town Clerk two months prior to the next annual meeting, for its acceptance and approval or otherwise at that meeting.

And that the School Committee be and are hereby instructed to discontinue the primary school now in the lower room in the old house, and to utilize all remaining school-room in town to the best advantage.

BENJAMIN POTTER.

VOTED. To adopt the Minority Report on new school building.

Report of Committee on widening Humphrey St.

REPORT OF COMMITTEE ON HUMPHREY STREET WIDENING.

In presenting to this meeting any further information we may have, we can only say we have diligently sought to obtain some further information of what assistance we could rely upon from the County Commissioners, and we find that before they can act understandingly on the matter the Town must first instruct the Selectmen to petition them to widen Humphrey Street to a uni-

form width, when they will call a public hearing, after which they will make a proposition of what they will do towards paying for the widening of the street, this does not commit the Town at its present stage. After the hearing and the decision of the Commissioners is made known the Town will be called at an adjourned Town Meeting to consider the proposition, and if accepted make the necessary appropriation for the carrying out of the work.

We recommend that the Selectmen be hereby instructed to forthwith petition the County Commissioners to widen and straighten Humphrey Street from the Lynn line to the Hay Scales, so-called, at the junction of Orient and Humphrey Streets, as shown upon a plan to be filed with said petition, and that said County Commissioners be requested to provide for the expense of such widening and straightening out of the treasury of the County in such manner as the said County Commissioners may seem just.

SWAMPSCOTT, *Nov. 15, 1892.*

A recount of votes cast at the recent election for Governor, was held this day, the result being the same as previously given, except the loss of one vote for William H. Haille, and a gain of one blank.

SWAMPSCOTT, *Nov. 18, 1892.*

At a meeting of the several Clerks of Representative District No. 17 held at the City Clerk's Office, Lynn, at 12 M., this day, it was found that Eugene A. Bessom, of Lynn, and Charles T. Jackson, of Swampscott, had received the largest number of votes. They were declared elected Representatives of this District to the next General Court. Certificates of election were prepared.

I hereby declare the foregoing to be a true record.

Attest:

GEO. T. TILL, *Town Clerk.*

SPECIAL MEETING, NOVEMBER 21, 1892.

RETURN ON WARRANT.

Pursuant to the within Warrant to me directed, I have notified and warned the inhabitants of the Town of Swampscott, qualified as herein expressed, to meet at the time and place and for the purposes herein mentioned, by posting up attested copies of the within Warrant in nine public and conspicuous places in said Swampscott, on Saturday, the 24th day of December, 1892.

JAMES WHEELER,

Constable of Swampscott.

In accordance with the foregoing Warrant, the voters assembled at the Town Hall, on Monday Evening, January 3, 1893.

The meeting was called to order by the Town Clerk, who read the Warrant and return thereon.

On balloting for Moderator, there were sixteen ballots cast, Eldridge F. Small receiving the whole number, was immediately qualified for the duties, and thanked the voters present for the honor conferred.

VOTED. To take up Article 2.

The reading of the Act under consideration was called for and the Chapter was read by the Clerk.

William H. Niles, Counsel for the Town, was asked to address the meeting. That gentleman responded giving the information desired.

A motion to proceed to ballot on Article 2 was negatived.

VOTED. To adjourn to Thursday Evening, January 5th, at 7.30 o'clock.

ADJOURNED SPECIAL MEETING, JANUARY 5, 1893.

Agreeable to the adjournment of Monday Evening, the voters assembled at the Town Hall on Thursday Evening, January 5th, 1893.

Called to order at 7.40 o'clock, by Eldridge F. Small, Moderator.

Records of previous meeting read and approved.

A. R. Bunting, Chairman of Selectmen, stated that he with others of the Board had seen the County Commissioners; that they thought the adoption of the Act under consideration a wise thing for the Town to do, and that said County Commissioners would be in accord with such action.

VOTED. To proceed to ballot on Article 2.

There were twenty-five ballots cast as follows: Yes, 12; No, 13.

VOTED. To dissolve at 8 P. M.

REPORT OF THE SELECTMEN, 1892-1893.

TO THE CITIZENS OF SWAMPSCOTT:—

Again it is our pleasure, as it is our official duty, to lay before the citizens of Swampscott a rescript of our transactions for the year now drawing to a close. We feel that we can the better do this as the past year has been one of prosperity to all. The interests of the town have been well guarded. The appropriations entrusted to our charge have been judiciously expended, as will appear on reference to the reports of the different departments hereto presented. Many subjects of vital interest to the town have received our undivided attention. Our views of most of these have been fully set forth in previous reports, and we do not feel it necessary to reiterate them, trusting to the judgment of an enlightened community who must decide these important questions for themselves.

Progress dominates the present age in all that goes to make a community prosperous, and should be the first article of faith in the catechism of the public officer. Progress when made in a town is as great a factor as when made in a large city, and what would be the fate of either if it ignored this governing principle. Liberality or parsimony in judicious expenditure influences public feeling, and has its weight on future greatness or littleness of a competing municipality such as Swampscott surely is at this time, when every town,

hamlet and inlet on the North Shore is putting forth its greatest effort to entice the summer visitor within its border. The greatest factors in accomplishing this are good school houses, good roads, with wide avenues, good churches, well lighted streets, well policed, and accommodating officials who make every effort to make the visitor fully satisfied in locating with us. The want of these would give us a certain forced isolation, and a sense of injury to our otherwise future progress.

HUMPHREY STREET IMPROVEMENT.—In connection with this line of reasoning we wish to call attention to the improvement just completed on Humphrey Street, commonly called the Swamp Road, one which fully emphasizes all we have said above. The laying out and grading of Huron Street, from Pine Street to the Lynn line, already accomplished, and the acceptance of Ontario Street to be acted upon at our next annual town meeting will open up much needed territory, and add no little to our tax list.

BURRILL STREET RAILROAD CROSSING.—The abolition of the grade crossing of the Boston & Maine Railroad Co. tracks on Burrill Street, may be considered as practically accomplished and the construction of the bridge will be commenced early in the spring.

STACEY'S BROOK OUTFALL.—The long contemplated outfall for Stacey's Brook so much needed has at last been accomplished, and so far has realized all that its advocates predicted. The outlet at no time has been obstructed by the action of the sea, nor is such a result feared in the future. The territory bordering the brook has on account of this improvement, been better drained, thus adding to the health, convenience and future prosperity of its immediate locality, as well as to the general improvement of the shore. The lateness of the season prevented us from completing the straightening of the brook, as contemplated, to facilitate the

better flow of water, which can be better accomplished during the dry season of summer.

POLICE.—The Police department of the town has been administered during the past year to the eminent satisfaction of the Selectmen, and we trust to that of our citizens generally. The members of the force are gentlemen well known, and under their care and guidance we may all feel sure the safety and interests of the community will be well cared for in the future as in the past. These are no experimental evidences of what will result in the general principle of progress.

WIDENING OF HUMPHREY STREET.—At the annual town meeting the Selectmen were instructed to petition the County Commissioners to widen and straighten Humphrey Street from the Lynn line to the hay scales.

In compliance with the vote, the Selectmen immediately brought this matter before the County Commissioners, who, on two occasions, at least, viewed the ground, giving two public and many informal hearings, after which they were unanimous in their determination not to undertake the work in behalf of the County, but advised the Selectmen to bring before the town for acceptance the act of the year 1891, which gives to the Selectmen powers concurrent with the County Commissioners over such matters within the limits of the town.

Accordingly a special meeting of the voters was duly called and the matter laid before the meeting, which refused to accept the act to give the Selectmen power to hear and determine whether or not public convenience and necessity required the widening and straightening of this highway. It was our intention, had we been empowered so to do, to have issued immediately the legal notices for such hearing, as the law requires, and to have determined before the annual meeting whether or not such highway ought to be widened, the probable cost of such widening with definite recommendations

as to how money for such improvement might be secured.

It is clear that the travel on this great thoroughfare is constantly increasing, that the value of land is likely to advance and the construction of new buildings upon the street may at any time vastly increase the cost of making this improvement. The Selectmen having asked the town to vest them with authority to deal with this question, and having been refused, now leave the matter in the hands of the town for such further action as it may see fit to take.

PETITION OF LYNN & BOSTON RAILROAD CO.—A petition has been presented by the Lynn & Boston Railroad Co. for the right to erect and maintain a double line of poles, one on each side of the street, together with the overhead wire system over Humphrey Street from the Lynn to the Marblehead line. The street over which this privilege is desired is one of our most important business streets as well as a pleasure drive, the only thoroughfare through a portion of our town, already too narrow for its present use. To add to this the electric system with its cars driven at a rate of speed to make the proposed quick time is a matter which every one should carefully consider before deciding in favor, for the simple asking. At a public hearing on the subject, where it was stated by the officials of the road that no additional tracks or turnouts would be required, the sense of the meeting was tested by vote, a majority of those voting were in favor of the petition, provided the Railroad Company would pay to the town a portion of the cost of street widening. Communications were received from several large tax payers of the same nature. Numerous interviews have been held with the railroad officials, who decline to pay for the privilege alone, or any part of the street widening, unless they are allowed to double-track Humphrey Street from their stable to the junction of Burrill Street, a proposition we decline to entertain under any consideration, and are of the unanimous opinion that their petition should not be granted unless the

Railroad Company comply with such terms as may be deemed reasonable.

A bill is now pending before the Legislature allowing such charges to be made as will be deemed advisable for the best interests of the public at large with a view for revenue to the city or town treasury.

ESSEX STREET EXTENSION.—A petition was also received for the extension of tracks with the electric system over Essex Street to the Salem line. A public hearing on the matter was given, which was fully attended, no objection was offered, the petition was granted and a side location was given. The difficulties mentioned in the case of Humphrey Street do not exist on this street, as the road with the exception of the railroad bridge is of ample width, giving plenty of room for all travel; a change of grade was necessitated by the laying of tracks. Considerable blasting will have to be done. A special appropriation of twelve hundred dollars is recommended, to be used in blasting and regrading this street.

PETITION OF MESSRS. PORTER AND KING.—A petition has been received from the abutters upon the town lot on New Ocean Street, asking the town to build an embankment wall so that they can fence and maintain their property line. They complain that the removal of the gravel and the consequent caving of the banks is causing serious inroads to be made upon their estates,—they have asked the town several times to remedy the matter, they now make a final appeal; some action should be taken on this matter by the town. The removal of the remaining gravel to be used upon the streets would be valuable, as well as the large amount of room which would be acquired and is very much needed in the rear of the Engine House. It is recommended that the petition be granted and an appropriation of \$800 be made to carry out the work.

FINANCIAL.

The total indebtedness at the commencement of the

year was	\$42,333 32
Borrowed (Water Loan)	4,000 00
	<hr/>
	\$46,333 32
Notes paid	8,833 33
	<hr/>
Present town debt	\$37,499 99

In accordance with Article 2, Section 3, of the By-Laws, after consultation with the different Boards, we recommend the following amounts for the several departments:

Selectmen Department	\$4,300 00
Highway Department	5,500 00
Public Schools	11,500 00
Health Department	1,500 00
Poor Department	2,500 00
Fire Department	3,500 00

State Tax, (estimated)	4,235 00
County Tax, (estimated)	4,952 28
Repairs Essex Street	1,200 00
Retaining Wall, Town Lot, New Ocean Street	800 00
Street Crossings	400 00
Building Ontario Street	700 00
Street Lighting	6,400 00

EXTENSION OF ROCKLAND STREET.—A petition has again been received for the extension of Rockland Street to Elmwood Road. It will be seen by reference to the Annual Report for the year ending February, 1891, that a committee appointed on this subject reported adversely by reason of the large outlay required, (\$5,800). Since that time the cost of the proposed improvement has been increased by the building of Mr. Kitfield's house, causing the street to run diagonally across his remaining land, making it unfit for the purpose for which he purchased it, also necessitating the turning around of Mr. Delano's house, to which he decidedly objects. Mrs. Stone also objects to the taking of any of her land. As the conditions are not as favorable to the town as they were in 1891, or the demands for the street more imperative, the Selectmen have no hesitation in endorsing the report of the former committee, that the town take no further action.

Respectfully submitted,

SWAMPSCOTT, MASS., Feb. 27, 1893.

REPORT OF THE SCHOOL COMMITTEE, 1892-1893.

TO THE CITIZENS OF SWAMPSCOTT :—

Your present School Board have come to their place of trust at a confessedly responsible, and difficult period—a transitory period—a period in which our town is growing rapidly in its school population ; a period when there is pressing upon us from all sides the abounding vitality of the public school idea ; when the spirit of progress is knocking at our doors and asking admission ; when a new school house, representing a new order of things, is demanding by the inevitable logic of events that it may supplant the old school house representing the old order of things ; when we feel the claims of the rising generation, who will tarry with us for what we can give to them, or who will go elsewhere for what we fail to provide.

“ New occasions teach new duties.” We, as a school board, force no issue, we simply present an issue which confronts us and for which we are in no wise responsible, but which we hope to meet wisely and successfully for the future growth and prosperity of our town. Our young people are feeling the thrill of a new purpose, and a new life all around our borders. We must let this new life come into our borders, or our best young life upon which our future hopes depend will go out from our borders and contribute to the prosperity of other communities to the impoverishment of our own.

As a School Committee we trust we have the heart and the energy to do the right thing. Our work is a labor of love.

We see an opportunity to greatly increase the permanent population of our town with a citizenship that will add to our elements of strength by providing such general facilities as are found all around us and such extra facilities as our natural advantages afford. We need that sympathetic response from the community in all our honest efforts, which will enable us to know the right thing, and that sustained effort which will help us to do the right thing.

MORALS AND DISCIPLINE.—We believe that the morals and discipline of our schools are improving with a steadiness that entitles us to a just satisfaction. Our teachers are very properly making high character and aim of greater importance than high scholarship, and cleanliness of speech and thought are even more earnestly inculcated than cleanliness of person and apparel. Special efforts are made to develop the moral sense of the pupils.

TRUANCY AND TARDINESS.—Truancy has not been as common an offense the past year as in years previous. Patrons of the school should welcome the truant officer, for his duties are performed not only in the interest of the youth, but in obedience to the law which also makes it obligatory that parents shall render assistance.

Every possible effort and device which ingenuity can suggest is exercised in behalf of regularity and promptness of attendance, and we solicit the co-operation of parents in this respect.

The severe weather of the present winter, together with measles and other diseases, has co-operated with dilatoriness of parents and pupils in making a low record in this regard. Could parents appreciate the earnest efforts and commendable ambition of the teachers to give the children the best training possible, they would feel that any failure to keep their children regularly and promptly at school would seem almost ungrateful if not cruel to the teachers whose patience is often sorely tried by absentees and tardy scholars. It is

unfortunate that one careless child or parent should spoil the record of a whole school. In the B Grammer grade, presided over by Miss Hadley, we have a record of only six cases of tardiness for a term of sixteen weeks where the enrollment is 35. Our aim is that such a record may be the rule and not the exception.

It should be kept in mind that if we are to be law abiding citizens, our children are to be kept in school thirty weeks in the year, with only two weeks of unexcused absence.

OUR CORPS OF TEACHERS.—It is matter for congratulation that there has been no change in our corps of teachers during the past year, who are now employed by the tenure of office act, which retains them from year to year so long as their work proves satisfactory, thus saving the necessity for re-employing them each year. We repeat the statement of last year, that they teach more weeks in the year for the same pay, and have fewer recesses for storms, than the teachers in many surrounding towns.

Miss Susie S. Harris, though not a regular teacher, has done so much substituting and has done it so well, as to be worthy of special mention.

Miss Hutt, one of our own graduates, is fulfilling the promise which she gave when she first entered upon her work last year.

There has been more detention of teachers by sickness during the past year than was the case the year previous, and this calls our attention to what was said last year as regards ventilation and sanitation:

“As civilization advances, both children and adults grow more and more sensitive as to bad air and inferior sanitation. The modern improvements in public buildings along these lines are such as must sooner or later compel some positive changes in our school buildings. Both teachers and pupils have often prosecuted their work under the disadvantages of bad headaches and colds.

There are ventilating appointments now which do not necessitate the raising or the lowering of windows, thus sub-

jecting some one to a cold draught, in order that the school at large may breathe pure air. In modern school buildings the sanitariums are often placed in the basement, which basement has hard cement bottom and affords a light and airy place for play ground in stormy weather. Proper and pleasant surroundings are an important feature in securing a good education."

Swampscott ought to cherish the commendable ambition of being as noted for her excellent people as for her beautiful scenery, and as our public school teachers are an important factor in bringing this about, they should have light and air and room unstinted. Their surroundings should be every way pleasant, tasteful, and agreeable.

Nature has done much for our town in the beauty she has lavished upon us. We are more indebted to natural scenic attractiveness for the fair name and prosperity of our town than to any other cause. Let man put his hand beside nature's hand, and let our new school building emphasize the fact that our citizens fully appreciate the real genius of our place, and the great source of our prosperity.

PATRIOTISM.—The flags now fly on all our school houses on pleasant days. This is in harmony with a custom which prevails throughout the country, a practice which tends to cherish the sentiment of patriotism. The children themselves, almost without suggestion, contributed the money necessary to purchase the first flags. The School Board provides the flag staff and replaces the flag when worn out.

Columbus Day was celebrated in a manner which proved very acceptable to the people and creditable to the schools. Our teachers are wisely fostering the public spirit of their pupils by spending a little time each day in noting the progress of current events. These exercises are always profitable and often prove of a highly interesting character.

MUSIC AND DRAWING.—Our citizens have had opportunity to note the progress of our pupils in music by their sing

ing on graduating evening, Memorial Day, and Columbus Day.

An Exhibition in Drawing, to be given at the Town Hall during the month of June, will afford an opportunity to witness the progress made in this department.

The tendency of instruction in these branches is not only to cultivate the finer qualities of the intellect, but to develop also the finer moral instincts.

SUPPLIES.—Our schools are above the average in other towns and cities in the completeness and variety of school supplies. Such is the testimony of the agents of the State Board of Education. A much needed popular encyclopedia has been furnished during the past year. In this connection it should be noted that while the number of scholars has increased by more than sixty during the last three years, there has been no increased appropriation called for in that time. The equipment has improved and the average number of scholars has increased while the average cost of education per pupil has steadily decreased.

A chemical apparatus and laboratory is still an unprovided but necessary requisite of a well equipped High School. This is impossible with our present building. A six-room school building is *inadequate for our present needs* and will much less accommodate them in the very near future.

We have ample assurance that people are watching the action of the town in regard to public school matters, with a view to settling here, if ample and adequate school facilities are provided. We have been compelled to use the dingy and ill ventilated Primary Room at the Redington Street School for lack of ability to make any other arrangement, although a diligent effort was made.

CIGARETTES AND TOBACCO.—We are still unable to suppress entirely, as should be done, this baneful habit. The frequent deaths reported, by the use of cigarettes, should

cause every parent to view the growth of this practice with great alarm.

We again call attention to the statutes on this subject which are as follows:—

CIGARETTES AND TOBACCO.

SECTION 1. No person shall *sell* any cigarette, snuff or tobacco in any of its forms to any person under sixteen years of age.

SECTION 2. No person other than the minor's parent or guardian shall *give* any cigarette, snuff or tobacco in any of its forms to any minor under sixteen years of age.

SECTION 3. Any person violating any of the provisions of this act shall be punished by a fine not exceeding fifty dollars.

HIGH SCHOOL GRADUATES OF '92.—Miss Susie S. Harris, of our last graduating class, has already been mentioned as having entered upon a field of successful work. Miss Mabel Estelle Ingalls entered in September, the Boston University, having before graduating, passed the entrance examinations without any conditions. James Hammar, a pupil of our High School for two years and a half, though not a graduate, left here to enter the Mass. Agricultural College, where he is doing good work. We wish more pupils would complete our course of study. The advantages are apparent. We are pleased to note that the present graduating class is much larger than for many years.

REPORT OF TRUANT OFFICER, 1892=1893.

TO THE SCHOOL COMMITTEE OF SWAMPSCOTT :—

As Truant Officer for the town I have made 18 calls, only three of these were found to be cases of truancy. The severity used last year has seemed to have a most wholesome effect, and we may congratulate ourselves upon the regularity of the school attendance for the past year.

Respectfully submitted,

CHARLES RODERICK,

Truant Officer.

SWAMPSCOTT, MASS., Feb. 27, 1893.

Report of Committee on Proposed New School Building, 1892=1893.

TO THE CITIZENS OF SWAMPSCOTT:

The undersigned were appointed a committee to make inquiries concerning the purchase of additional land and to report plans for a modern six-room school building on the old site. These plans are now on file at the Town Clerk's office as per instructions.

Mrs. Wiley asks five thousand dollars for her place, and Mr. Richardson is unwilling to sell his land for any consideration. As a majority of your committee have done the work in harmony with instructions from the town rather than by the dictates of their own judgment, we herein submit to the citizens of Swampscott the following:

We have carefully studied the school and school house problem in all its bearings. We have done this as faithful servants, that we might give a good account to the town.

Future needs as well as present conditions have been considered. In taking counsel of leading educational men in other towns we have done what all wise men are wont to do.

We have visited outside to find what has proved highly satisfactory in other places, we trust the disposition to keep abreast the times in this age of progress, is a commendable one. It is only by so doing that we can foster a just local pride on the part of our youth. We shall thus stimulate their mental and moral progress. We shall thus keep them at home and secure for ourselves that credit for their education which is now being given to other towns.

We believe that with proper support, Swampscott can be

so noted for her public schools as to increase her popularity thereby. We now invite attention to the following points:

I.—The present High and Grammar School Building has been pronounced unsuitable by a committee of nine responsible men, including selectmen and school committee.

Patrons of the school are emphatic in their protest against its continuance.

State authorities have put upon it the seal of condemnation. The opinion is nearly or quite unanimous that repairs cannot make it suitable.

II.—The town at an adjourned meeting last spring, instructed that plans for a modern school building should be reported at the coming town meeting. Such plans are now on file at the Town Clerk's office, and present an economical and substantial building, suitable only for the present site.

III.—We call attention to the fact that seven out of nine of the committee above alluded to, have expressed themselves as averse to building on the old site, unless the situation makes such procedure inevitable.

IV.—Does the condition of things make such a procedure inevitable?

At the corner of Rockland and Highland streets there is a lot known as the Breed lot. Now let us note the points of contrast between the old site and the Breed lot. First compare the area of the two lots. The old site, when increased by the Wiley lot which must necessarily be purchased in order to make room for the proposed new building will contain 19,808 feet. The Breed lot contains 43,560 feet, or one acre.

Second, let us compare cost. The old site as it is, will realize thirty-six hundred (\$3,600) dollars. Mrs. Wiley asks five thousand (\$5,000) dollars for her lot.

We see therefore, that the old site with its necessary additions will cost eighty-six hundred (\$8,600) dollars.

The Breed lot can be purchased for three thousand (\$3,000) dollars. Note the contrast:

Eighty-six hundred (\$8,600) dollars for only 19,808 feet, or three thousand (\$3,000) dollars for 43,560 feet!

V.—The Breed lot will of course entail some additional expense for grading.

Contractor and architect stood together on that lot, last spring, and agreed that the building could be so placed there as to make the cost of grading amount to much less than would seem possible at first view. The contractor stated that a grade could be put upon the lot for one thousand (\$1,000) dollars that would give a fine effect.

VI.—The Breed lot can be supplemented by as much land as may be thought necessary by purchasing from the adjoining Swampscott land trust, at the rate of only five cents per foot, a suggestion which will at least bear careful consideration.

VII.—The street in front of the present building is but 36 feet wide, and the proposed plan gives us but 12 feet yard room in front of the new building, and comes within 12 feet of the abutting property on either side, a fact which is likely to give us less light and air in some parts of the new building, than we now have in the old.

Added to the above fact, is the greater liability from fire, owing to the proximity of a *hay loft* upon adjoining property.

Contrast this congestion with the roomy and attractive frontage and elegant approaches which are possible with the more than doubled area of the Breed lot.

VIII.—We see at once how much superior the Breed lot is in point of light, air and scenery.

IX.—When the electric cars pass on Humphrey street, as ultimately they inevitably will, there must necessarily be far greater liability to accident and loss of life on the old site than on the Breed lot.

X.—If we build on the old site, more than two hundred scholars must for months pursue their studies in the immediate rear of the uprising walls, subject to such darkness, straitness, noise, as will subject them to serious and even dan-

gerous disadvantages. On the Breed lot all this will be avoided.

XI.—It may be agreed that in Lynn and Boston, school houses are built right on the street. This is not from choice surely, but from necessity. It cannot be claimed that we are under such necessity. Cities and towns are more and more providing resting places, breathing spots, parks and gardens, according to their ability. Where room is necessarily denied them, they are quick to avail themselves of every other possible advantage.

We are denied many of the advantages which cities possess, but let us not deny ourselves this great advantage of room, especially when it is offered to us at such cheap rates. Room, beauty, and attractive scenery are a chief part of our stock in trade. Let us make the most of them. We do great wrong to deny our children the light and air, and room and scenery which Providence has so munificently provided. They spend a large part of the formative period of their lives in the school room. Let their surroundings be elevating and of pleasant memory. As a matter of fact, all over the country, the people are, wherever they find it possible, providing ample grounds for their school buildings, with opportunities for planting trees.

XII.—It may be objected that the Breed lot is too far to one side. Let us note: First, it is only four minutes walk from the present site. Second, there will not be two minutes difference between the old site and the Breed lot so far as the walk from the Lower Beach and Farms portion of the town is concerned.

Third: In many cases the difference for children from the above mentioned portions of the town, favors the Breed lot by more than two minutes.

Fourth: Of about one hundred houses which have been built during the last four years within the more central limits of the town, nearly seventy of them are within ten minutes

walk of the Breed lot, and every one of them is within 13 minutes walk.

If there is not already, there soon will be as many houses in our town situated nearer to the Breed lot than to the old site, so that there is every promise that the future growth of the town is to make the Breed lot the more central of the two proposed sites.

XIII.—It may be objected that the Breed lot will necessitate the climbing of hills on the part of the children. Many of our children must now climb the same hills in going home from school, and the number of such must increase as time goes on because the future growth must necessarily be on the hills. Moreover nothing but the strong arm of the law can prevent the children from climbing the hills fifty times a day, in coasting time.

Report of Committee on Proposed New School Building, 1892=1893.

MINORITY REPORT.

TO THE CITIZENS OF SWAMPSCOTT:—

Inasmuch as the Special Committee appointed by the town was instructed to make terms for land adjacent to the present Grammar School lot, and to file suitable plans for a new building, to be erected thereon, the undersigned supposed that the duties of the committee ceased when these results were accomplished. It is, therefore, with considerable surprise he learns that a statement, signed by a majority of that body, and originally intended for private distribution in the form of a circular, is to be incorporated into the annual printed town documents, as the report of that committee. Let this fact be his apology for intruding upon the favor of his fellow-townsmen the following observations:—

The town has twice decided, each time by a large majority, in favor of the present site. On this point the advice of the committee was not sought.

There is nothing new to present in favor of the Breed lot.

Why is this land worth almost seven cents per foot, and adjoining land worth only five cents?

If we want much land for the money, why not get back still further into the woods?

Who has offered \$3,600 for the old lot?

To whom is it worth more than to the town?

The town has voted to keep it, and it is still the best available for school purposes.

Wouldn't the present winter be a charming season to enjoy the "light and air" and the "*attractive frontage and elegant approaches*" of the Breed lot!

SWAMPSCOTT, Feb. 27, 1893.

REPORT OF LIBRARY TRUSTEES, 1892-1893.

TO THE CITIZENS OF SWAMPSCOTT :

The year just closed finds the Library in its usual prosperous condition, about the usual number of new books have been added, (208) which makes our collection 5,848 volumes. A large proportion of the books purchased are from works of fiction. This is necessarily the case, because of the somewhat limited means at our command for the general support of the Library, and after paying the running expenses, we do not feel that it is in justice to its patrons to lumber up our shelves with matter that but few of our people take enough interest in to read. We however, in our purchases, endeavor to select only the best of its kind, and as fast as worn out eliminate such as in our opinion are not first-class.

A perusal of our acquirements the past year, will disclose the best works published in Biography, Travels and Science as well as fiction.

In the matter of donations, our Library does not appear to be fortunate, and it occurs to us that great gains could be accomplished if citizens having books at home for which they have no use, would send them to the Library and result in a very good beginning in gifts to the Library. We are indebted to our representative Mr. Chas. T. Jackson for several documents published by the state of Massachusetts.

Our circulation for the year has been 13,233; fines and catalogue sales amount to \$22.00.

Miss Honors the librarian, and assistants Masters Ingalls and Macpherson deserve a word of praise for their faithful attention to duty.

Owing to the unsafe condition of the old hose wagon the engineers deemed it expedient to have the opinion of practical wagon builders as to its safety in carrying the heavy load required. After being examined by three experienced men, the engineers were informed that the wagon was unsafe and unfit for service. Upon consultation with the Selectmen an order was placed with James B. Duffy, of Lynn, for the construction of a two-horse hose wagon, with all modern improvements, for the sum of \$450, he allowing \$50 for the old wagon. That the new wagon combines all the elements of strength and is a thing of beauty in itself, all who have seen it will admit. Upon the purchase, by the town, of horses, it was deemed best to procure the old wagon, which was done at the price allowed (\$50).

When the appropriations were made at the annual town meeting, the engineers did not have in mind the expense for the care and feeding of horses and cost to properly fit up the stable by remodelling the stable and laying sanitary drains

for the same. In addition to these items a platform was built in the rear of the stable, also a wagon-shed adjoining the town store-house.

These improvements, with hay and grain bills and the services of a man for the care of the horses, are the causes for the amount overdrawn in our department, which appears in the auditors' report of expenditures.

The following proposition from Engineer Downing, chief of the fire department of the City of Lynn, we present for your consideration :

Connect the fire alarm of our engine house with the new engine house in Lynn, which contains a chemical engine and is situated at the corner of Elsmere Place and Lewis Street. The expense of connecting the fire alarms to be divided equally between the City of Lynn and the Town of Swampscott.

The chemical engine in Lynn to answer *all* alarms in Swampscott and the apparatus in Swampscott to answer alarms from two of the Lynn boxes, viz: box 57, Essex, near Tremont Street, and box 82, Lewis, corner New Ocean Street, both of these boxes being near the division line between Lynn and Swampscott.

A petition has been presented to the Selectmen, to be inserted in the warrant for the annual town meeting, asking that a fire alarm striker be connected with the bell on the Congregational church, Blaney Street.

The engineers are of the opinion that if this striker should be placed on the church bell that it would be of great utility in giving the firemen additional means of hearing alarms, as frequently the bell at the Town Hall cannot be heard in all sections of the town, on account of strong currents of wind conveying the sound in other directions, also that the box number could be more easily counted in this locality, and in the event of the striker at the Town Hall not being in working order, would be an additional means of giving a general alarm.

Below we present the following recommendation for your consideration :—

First, we recommend the location of a fire-alarm box on the Mudge Estate, at junction of Sheridan, Andrew and Farragut roads ; also a box opposite the Phillips' Beach Station of the Boston & Maine Railroad Co., and that the sum of \$125 be appropriated for this purpose.

Second, that the town place a fire-alarm striker on the Congregational Church, Blaney Street, and that the sum of \$225 be appropriated for same.

Third, that the town purchase one thousand feet of hose, estimated price, 65 cents per foot, and that an appropriation for the same be made.

We trust that our recommendations will meet with your approval.

Respectfully submitted,

Report of Committee to Purchase Horses for Fire Apparatus.

TO THE CITIZENS OF SWAMPSCOTT:—

The undersigned who were appointed as such committee, respectively submit the following report:

We have purchased five horses, two for use on Steamer One, two for the Hose Wagon, and one for the Ladder Truck. They have been used on the several pieces of apparatus, and been found well adapted for the work. We would recommend that carts and suitable harnesses be purchased and that the Engineers co-operate with the Superintendent of Streets in the use of the horses upon the highways; by so doing the expenditure will be one of profit as well as of protection to our town.

Respectfully submitted,

REPORT OF BOARD OF HEALTH, 1892-1893.

TO THE CITIZENS OF SWAMPSCOTT :

The Board of Health respectfully submit the following report :

During the past year we have received and investigated all complaints brought to our notice, and have official notice of seventeen cases of contagious diseases ; nine (9) of scarlet fever, six (6) of typhoid fever and two (2) of diptheria, one of which proved fatal. During the past year we have been put to considerable trouble by citizens not being prompt in notifying us of contagious diseases, as required by law.

The collecting of offal has been carried on the same as last year.

The manner in which the beaches have been kept has given general satisfaction ; except the lower beach where there are several cesspools and privies that should be removed from the beach. The residents along King's Beach had considerable trouble the first of the year, from the overflowing of their cesspools, caused by the surface water filling them. After considerable discussion in relation to what should be done to dispose of it, they decided to provide extra cesspools to receive the overflow.

The Board suggest that the citizens be as prompt in cleaning up their premises, as they were last year, and also to follow out the *Health Regulations* of the town.

Health Regulations of Town of Swampscott.

The following Regulations have been adopted by the Board of Health:

SECTION 1. The owner, agent or occupant, having care of any tenement used as a dwelling-house, shall furnish the same with sufficient drain, under ground, to carry off the waste water ; and also with a suitable privy, sufficient for the accommodation of all who may use it.

SECT. 2. All vaults or privies shall be so constructed that the inside of the same shall be at least two feet distant from the line of every adjoining lot or street, and the same shall be kept tight ; nor shall the contents of any vault be allowed to accumulate within twelve inches of the even surface of the ground, or otherwise become offensive.

SECT. 3. All waste water shall be conveyed through sufficient drains, under ground, to a common sewer, or to such reservoir, sunk under ground, as shall be approved by the Board of Health, and no person shall suffer any waste or stagnant water to remain in any cellar, or upon any lot or vacant ground, by such person owned or occupied.

SECT. 4. Whenever, upon due examination, it shall appear to the Board of Health that the number of persons occupying any tenement or building in the town is so great as to be the cause of nuisance or sickness, or the source of filth; or that any tenement or building is not furnished with vaults constructed according to the provisions of the regulations, or with sufficient privies, or drains under ground for waste water, or from any cause has become unfit for habitation, they will thereupon issue their notice in writing to such persons, or any of them, requiring them to remove and quit such tenement or building within such time as they shall deem reasonable.

SECT. 5. No person shall throw or put into any public place, or pond, or running stream or body of water, or in any other place where the Board of Health may deem it a nuisance, any dead animal, dirt or rubbish whatsoever, nor shall any person throw into or upon any flats or tide water within the jurisdiction of the town, any dead animal, filth or offensive matter.

SECT. 6. No person shall erect or maintain, within the limits of the town, any building or structure used for a slaughter house, or for the manufacture or refining of kerosene oil or soap, the trying out of lard, the business of tallow chandler, or the tanning, dressing or coloring of

leather or skins, or any other noxious or offensive trade, or exercise or carry on such trade, business or employment, without a license from the Board of Health. defining a place for the same, and any such license may at any time be revoked.

SECT. 7. No person shall collect any house offal or night soil within limits of the town without a license from the Board of Health.

SECT. 8. No person shall bring into the town for sale any diseased, putrid, stale or unwholesome meat, vegetables or provisions.

SECT. 9. No person shall burn, boil or decompose in the town any bones or other refuse parts of meat cattle or other animal, without a license from the Board of Health.

SECT. 10. No person shall keep any swine within the limits of the town without a license from the Board of Health.

SECT. 11. Any person sick with the small-pox, scarlet fever, diphtheria, membranous croup, together with all persons in attendance upon him, will be subject to the control of the Board ; and no person shall enter or leave a house wherein any person is or has been sick with the disease, or in any way come in contact with the inmates of such house, except by permission of the Board.

SECT. 12. All persons are warned not to approach a house or the surrounding premises whereupon is displayed either a health card, a red flag by day or a red light by night.

SECT. 13. When a householder knows that a person within his family is taken sick of small-pox, scarlet fever, measles, diphtheria, membranous croup, typhoid fever, or any other disease, dangerous to the public health, he shall immediately give notice thereof to the Board of Health.

SECT. 14. When a physician knows that any person whom he is called to visit is infected with small-pox, scarlet fever, measles, diphtheria, membranous croup, typhoid fever, or any other disease dangerous to the public health, he shall immediately give notice thereof to the Board of Health.

SECT. 15. No child from any family or house infected with scarlet fever, measles, diphtheria, small-pox, or membranous croup shall be permitted to attend school without a permit from the Board of Health.

SECT. 16. The bodies of all persons dying of small-pox, scarlet fever, diphtheria, membranous croup, typhus or typhoid fever, must be immediately disinfected and placed in a tight coffin, which shall not be reopened. No certificate of death from either of the above-named diseases will be endorsed by the Board of Health until above regulations have been complied with. In above cases no public funeral will be allowed without permission from the Board of Health.

SECT. 17. Notice of domestic animals or cattle suffering with contagious disease, or suspected of suffering from contagious disease, shall immediately be given to the Board of Health by those having the charge of such animals or cattle.

EXTRACT FROM THE TOWN BY-LAWS.

ARTICLE VII.

SECT. 6. The contents of any sink, cesspool, or privy shall only be removed in a vehicle effectually covered and water-tight, and the same shall not be emptied on any beach or into the sea adjacent to any beach in the town, but shall be carried in such cart and disposed of in the earth or otherwise as the Board of Health may by rules provide, but apart from dwelling houses.

SECT. 26. No person shall put or cause to be put into any catch basin in the highway any filth, sewerage, slops or dirty water.

SWAMPSCOTT, February 28, 1893.

Report of Inspector of Provisions, Animals, etc. 1892=1893.

TO THE BOARD OF SELECTMEN :

I herewith present the first annual report as the Inspector of Cattle, Meat, Fish, Fruit and Vegetables, the position to which I was appointed by you under Chapter 195, Acts of 1892.

First inspection took place between July 18, and Aug. 15, 1892. Second inspection between Oct. 25, and Nov. 1, 1892. Third inspection between Jan. 26, and Feb. 1, 1893.

I find whole number of cows kept for production of milk, 142. Number kept in other towns, with milk sold in Swampscott by owners, 63. Number found diseased or in an unhealthy condition and sale of milk prohibited, 4.

Number of meat and provision stores, 5, wagons 1. Fish, markets, wholesale and retail, 3, wagons 3.

Number of peddlers detected offering for sale decayed or unhealthy fruit or vegetables, and made to leave the town with their load, 3, viz: one each of strawberries, bananas and potatoes. Places for slaughter of cattle and hogs, 1.

Not being able to obtain the necessary blanks and instructions from the State Commission until July 17, the first tour of inspection was delayed until July 18, 1892, the law requiring inspection to be made at intervals not exceeding three months.

I find the cows as a general thing well kept, stables clean, and well ventilated.

I have inspected provision stores and fish markets at short

intervals and in no instance have found any tainted meat or fish or found any odor showing that such might exist, which shows that the food used in Swampscott is of the highest grade.

The Slaughter-house is situated in Upper Swampscott and used mostly for slaughtering hogs, in cold weather only.

Respectfully submitted,

GEORGE NEWHALL, *Inspector.*

REPORT OF MILK INSPECTOR, 1892-1893.

TO THE CITIZENS OF SWAMPSCOTT:

Herewith I submit my report as Milk Inspector for the year ending February 28, 1893. The receipts for 12 licenses amounting to six (\$6.00) dollars has been paid to the Treasurer.

The proper Inspection of the milk sold in our Town appears to me a subject of considerable importance, and one in which our citizens should co-operate with the Inspector in a rigid enforcement of the statutes of the Commonwealth upon this question, with fairness to the licensees and justice to the public.

The number of licenses granted by the Inspector was 12, viz:

Report of Committee on Street Lights, 1892-1893.

TO THE CITIZENS OF SWAMPSCOTT:

Your Committee on Street Lights have attended to their duty and submit a report of their doings the past year, although there seems but little to be said.

Our streets have been well lighted and your committee feel that the present system is satisfactory to all, excepting on dark and stormy nights when the lamps are not burning, the moon being supposed to serve.

Your committee have added to the circuit of lighting during the past year two Arc lights and one Incandescent at the following localities:

1 Arc light on Monument Avenue.

1 Arc light at junction of Elmwood and Sheridan Roads.

1 Incandescent on Crescent Street (Upper Swampscott) as called for in Town warrant of last year.

The total number of lights in town is 82 Arcs and 15 Incandescents.

Your committee would recommend for the year an appropriation of six thousand four hundred dollars (\$6,400) for the regular lights and an additional five hundred (\$500) for lighting on dark nights when the moon is obscured.

Report on Laying Out Ontario Street as a Town-way, 1892-1893.

TO THE CITIZENS OF THE TOWN OF SWAMPSCOTT:—

The undersigned Selectmen of Swampscott having given printed and written notices to Elihu B. Hayes, Mrs. Eunice A. Farrington, Charles Farrington, Mrs. Ida P. Thomas, Mrs. Olive S. Horton, Samuel M. Carter, also to Elihu B. Hayes, as authorized agent for W. H. Pierce and George W. Ellis and to Charles P. Snow as tenant of Mrs. Hannah B. Remick, being all the parties known to us to be interested in the subject matter of the street to be laid out that we intend to lay out a street 50 feet in width, substantially on the line of Ontario Street, so-called, running from Pine Street to Lynn line, such notices requiring such persons to appear before us at the junction of said Ontario and Pine Streets, to view the premises on Monday, Jan. 30, 1893, at 3 o'clock, and at our office in Town Hall, at 4 o'clock the same day, and having caused such notices to be actually served according to law upon all such persons by a constable of this town, at least seven days before the day so appointed for the hearing, and having also given notice to them and all other persons (if any), who may be interested in the subject matter of said street, whose names are not known to us, or who have no place of abode in the town, or who have no tenant or authorized agent known to us, by posting up a copy of the written and printed notice—in three public places in the town at

least seven days before the time appointed for the hearing. Pursuant to such notice, we met at the time and place appointed for the hearing, and after hearing the parties and their remarks, and no objections being made, and the route of the proposed street having been viewed and examined by us after fully considering the subject, adjudged that it was necessary for the public convenience, that a street or town-way should be laid out and maintained by the Town as hereinafter described, to wit: The southern line of said way begins at a stone monument set in the boundary line between the Town of Swampscott and the City of Lynn, and runs thence North $71^{\circ} 40' 30''$ East, (magnetic) a distance of 193.63 feet to a second stone monument, thence North 85° East, (magnetic), a distance of 197.15 feet to a third stone monument set in the westerly line of Pine Street. The northerly line of said way is parallel with and fifty (50) feet distant from the said southerly line. All land lying between said southerly and northerly lines is included in this laying out. The location of said Ontario Street is in accordance with a plan and profile of the same made by Charles W. Gay, C. E., dated Jan. 2d, 1893, approved by us and filed in the office of the Town Clerk, Jan. 2d, 1893, and is adopted as a part of this record. No awards are made. The owners of the land abutting upon said street or way in consideration of the laying out of the same, as a town-way agree to waive all claim as right to damages of any kind on account of the said laying out by the Selectmen and the acceptance by the Town on account of any grading in constructing of the street. The estimate cost of construction is \$700. We have given the owners of the land abutting upon said street or way 15 days from the date of the acceptance of this report by the Town in which to remove their steps, walls and fences.

And said street or way so laid out, located and described, is hereby reported to the Town for acceptance, and when so accepted, allowed and recorded, is to be known as a town-way.

This record with the waiver referred to, have this day been filed by us in the office of the Town Clerk.

SWAMPSCOTT, Feb. 2, 1893.

AUDITORS' REPORT, 1892=1893.

TO THE CITIZENS OF SWAMPSCOTT:

Herewith we present for your consideration the forty-first annual report of the receipts and expenditures, together with a statement of the financial condition of the Town, for the fiscal year ending Feb. 28, 1893.

The accounts of the several departments and officials of the Town have been carefully examined and found to be correct, and satisfactory vouchers on file for payments made. All items in the Treasurer's account have been verified, and we have made personal inquiry at the Manufacturers' National Bank, and National Security Bank, both of the City of Lynn, to ascertain if the amounts as stated on deposit in the Treasurer's account current were actually on deposit on the dates upon which the quarterly audits occurred. We also hold certificates showing the amounts on deposit that appear in the Treasurer's account.

By the conditions of the Treasurer's bond, issued by the Casualty and Fidelity Co., Ellison, Coolidge & Co., Agents, Boston, the company require that the accounts of the Treasurer shall be audited quarterly and by reference to the Treasurer's account current it will appear arranged as audited at quarterly periods. While we do not wish to be considered as reflecting in the slightest manner, upon the integrity of our present efficient and trustworthy Treasurer, who has served the town in this responsible position during the past six years, and has, we believe, discharged his duties in an entirely satisfactory and highly commendable manner, we are

decidedly of the opinion after a trial of the system of auditing the Treasurer's accounts, at frequent intervals, that it is in keeping with modern business methods and might be extended to other departments of the Town with equally good results. The facility with which the quarterly examinations are accomplished, compared with the tedious method of auditing the entire account of the Treasurer at the close of the financial year, convinces us that the best interests of the Town require that our by-laws should be changed to make this desirable feature permanent.

The system of accounting, now in use by the Selectmen, is exceedingly cumbersome and with the increasing amount of business of the Town each year, makes it apparent that some other method must be adopted in the near future. We refer particularly to the custom of making an individual draft upon the Treasurer, by the Selectmen, in payment for the amount due, at the close of the week, to each person employed upon the several departments of the highways, for labor performed. This will also apply to any and all departments of the town in which weekly or monthly payments are made.

The recommendations below we present for your consideration:

First. That the following article be substituted for Art. II, Sec. 9, of the town by-laws:

The Town Treasurer shall on the first secular day of January, March, July and October, of each year, render to the Auditors in writing a full account of all his receipts and expenditures with his vouchers therefor.

Second. That the Selectmen arrange so much of the accounts of the several departments of the Town, that include weekly or monthly payments for salaries, labor, etc., in pay-roll form, making a draft upon the Treasurer for the total amount of the payment in each department; also that the same system of arrangement of the accounts in the ledger now in use be continued.

Third. That all accounts of the Town shall be audited at quarterly periods.

We find by the Treasurer's account, receipts from sundry parties aggregating \$1,203.49. This amount is for bills rendered by the Selectmen for accounts due the Town in their department and of which there is no record whereby the Auditors could verify the amounts received by the Treasurer.

This appears to us too much confidence to place in the integrity of parties who are debtors to the Town and we would respectfully suggest that the Selectmen keep a proper record of such transactions in the future.

The accounts of the Town, we think, should be presented to the Auditors in a manner to show that they balance. With the limited amount of time that is given the Auditors after the close of the financial year we do not think that they should be expected to locate errors.

A balance sheet should be made showing that the accounts are correct. This has been the custom and we recommend that it be continued.

One of the many satisfactory features of the year just closed is the excellent financial condition of the Town. The net Town debt Feb. 28, 1893, was \$26,520.79, being the smallest amount since the year 1882.
